Self Vision Tester

VAA-2000PSE/PCE automatically starts the test, when a patient gets close to VAA-2000PSE/PCE
This automatic eye measurement instrument does not need any exminer to stay with the patient.

How to use Self Vision Tester

VAA-2000PSE/PCE automatically starts the test, when tester's forehead gets close to the forehead supporter.

Please, place your forehead to the forehead supporter

When the examination starts. please push the lever to the guide(on the black background) direction which is the same with the picture in the middle of monitor

Please, push the red button, if you don't know

the red light appears to the way you move the lever

if you don't konw or cannot look clearly, please press the red button.

Easy to use & fast examination (within 30 seconds)

Easy to operate

Users move the lever with looking pictures through Eyepiece. If you have some difficulty to distinguish the picture, please press the red button.This tester can help users to complete the examination easily. Users who had never used it before would complete the examination easily by voice guidance.

Convenient function for users

Multi language support

Korean, English, Option(supporting some multi languages)

Auto cutting

When test is finished, test result is displayed on the upper display. Pressing printer button will automatically print out visual acuity distance and visual acuity value through the thermal printer and paper is automatically cut off.

Display function

User can see results directly in the upper display window after test is finished. Pressing print button to print out print paper with result value, and pressing reset button deletes result and prevents unwanted information disclosure.

Because of simple procedures of VAA-2000, even children and seniors can use this instrument very easily. Automatic Self Vision Tester will bring you more convenient life.
